

Qolsys IQ Panel 2 Software Version 2.0.6

The Qolsys IQ Panel 2 is a 7" touchscreen built with an Android operating system, providing full security and smart home functionality in an easy to use interface.

INTRODUCTION

ABOUT THIS GUIDE

This document outlines the basic hardware specifications and software directions to install and customize the IQ Panel 2. Note that the information presented is not comprehensive, but is specifically dedicated to those menus, features, and systems accessible solely to those with the proper installation code. Features accessible to users and installers alike are outlined in the IQ Panel 2 User Guide. The information contained is confidential and proprietary, and is solely owned by Qolsys Inc. Any reproduction, modification or distribution without permission is strictly prohibited.

PANEL OVERVIEW

Warning: This Product should be installed in accordance with the National Fire Alarm Code, ANSI/NFPA 72, (National Fire Protection Association, Batterymarch Park,Quincy, MA 02269). Printed information describing proper installation, operation, testing, maintenance, evacuation planning, and repair service is to be provided with this Product. In Canada the product shall be installed in accordance with the Standard for the Installation of Residential Fire Warning Systems, CAN/ULC-S540.

Warning: For Canadian installations this Product and all sensors associated with it (collectively, the "System") should be tested once a week. The test shall be performed also with primary DC power de-energized. For recommended smoke detectors maintenance instructions refer to user manual associated with compatible Qolsys model QS5110-P840 smoke detector.

INSTALLING THE PANEL

QOLSYS CONFIDENTIAL AND PROPRIETARY PAGE 9 OF 131

INSTALLING THE PANEL

WALL MOUNT OPTION

Insert your thumb or finger under the opening on the back cover and firmly pull up to remove. This cover is not needed for wall mount.

Press tabs on the bottom of the panel and pull apart to remove the back plate.

Mount to the wall using appropriate hardware ensuring it's level. 1. Hang the front of the panel with the hanging strap on the back plate as shown above.

11111

....

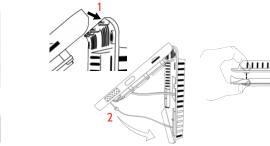

2. Make a small hole in the wall through the bottom right mounting hole and feed the white RF antenna into the wall.

IMPORTANT: Not properly routing the RF antenna in the wall will greatly reduce RF sensor range. Connect your 5.0 - 5.5v DC Power supply to the barrel jack or to the (+/Red) and (-/Black) terminals if using a custom length wire.

1. At a 60° - 90° angle seat the top of the panel on the top 4 tabs of the back plate. Ensure the tabs line up with the grooves on the panel.

2. Swing the panel downwards to close while feeding the antenna and power wire in the wall.

If there is a gap on the top because the panel did not completely close, firmly pinch at all 4 tab locations to ensure proper closure. You will hear a "pop" or "snap" sound when pinched.

QOLSYS CONFIDENTIAL AND PROPRIETARY PAGE 10 OF 131

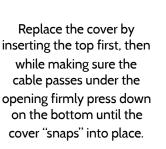

INSTALLING THE PANEL

TABLE STAND OPTION

Insert your thumb or finger under the opening on the back cover and firmly pull up to remove.

1. With the included power supply and cable, plug the barrel connector into the jack next to the terminals as shown above.

- 2. Route the cable under the hook next to the battery.
- 3. Route the cable through the strain relief opening.

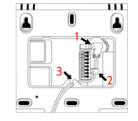

/////

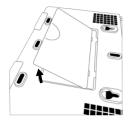

Insert table stand dowels into the 2 upper keyholes.

Slide the stand firmly upwards until you hear a "click" from each side.

WIRING DIAGRAM

NOTES

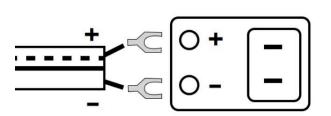

olsys

IMPORTANT IF USING CUSTOM LENGTH WIRE: Use 18AWG wire no longer than 25ft to ensure sufficient power is received at the panel.
NOTE: Inputs are used only for Burglary applications.
NOTE: Use only UL/ cUL listed external siren in UL/cUL listed installations. Rating:12vDC/ 300mA

QOLSYS CONFIDENTIAL AND PROPRIETARY PAGE 12 OF 131

INSTALLING THE PANEL

POWERING THE PANEL

Connect power supply. WARNING! Use 5.0 - 5.5v Power Supply ONLY

If using the provided cable, the "striped" wire is (+)

IMPORTANT IF USING CUSTOM LENGTH WIRE: Use 18AWG wire no longer than 25ft to ensure sufficient power is received at the panel. Press and hold the power button on the right side of the panel for 3 seconds to power up.

SETTINGS

Setting	Description	•	
	Add, Edit or mange local lighting automation rules. These rules are separate from any cloud based rules that may be set through Alarm.com. Examples of possible rules are as follows:	12:55 : 02/01/15	Swipe down for access
Automation	 Night: Turns light on at 7pm and off at 6am Evening: Turns light on at 7pm and off at 11pm Front Door: Turns light on for 15mins when Front Door opens (must have a sensor with the default quick name "Front Door" added in the panel) Doorbell: Turns light on only after 7pm for 15 min. when Doorbell is activated (must have a sensor with the default quick name "Doorbell" added in the panel) 	SETTINGS	
Activity Monitor	Activity Monitor allows access to disarm sensors that are programmed as 24 hours zones, such as Sensor Groups 8, 9 & 25. A valid Master, User or Guest code is required to control 24 hour activity sensors. 2 options are provided:		
	 Quick Access: 300 second temporary access Deactivate: Disarms 24 hour sensors until they are re-activated manually 		
Advanced Settings	Access advanced settings & programming. A valid Dealer (default 2222), Installer (default 1111) or Master Code (default 1234) is required

INSTALLER/DEALER SETTINGS

Setting	Default	Description
Loss of Cell Signal Timeout	30	Select the length in minutes (10-120) before reporting a loss in cellular signal
Communication Test	Monthly	Choose Never, Weekly or Monthly when enabling the automated communication test
SIA Limits Note: for UL/cUL set entry delay to 45 sec. and for UL set exit delay to max 120 sec. and for cUL set exit delay to 60 sec.	Enabled	 When enabled, the range for entry and exit delays is as follows: -Entry delay: 30-240 seconds, Exit Delay: 45-254 seconds When disabled, the range for entry and exit delays are as follows: -Entry delay: 5 to 240 seconds, Exit delay: 5 to 254 seconds When enabled the range for Dialer Delay is: 15 to 45 seconds When disabled the range for Dialer Delay is: 0 to 254 seconds
Languages	English	Set the panel's primary language to English(USA), French(Canada), Spanish(Latin America)
Favorite Languages	English/Spanish	Set the Panel's language toggle to your favorite 2 languages using French, English or Spanish
IQ2 Panel	greyed out	Currently unavailable. Reserved for future use
Jam Detection*	Disabled	When enabled the system can detect when an unusual amount of RF signals are being transmitted leading to a potential panel malfunction. This will report to the central station and handled accordingly

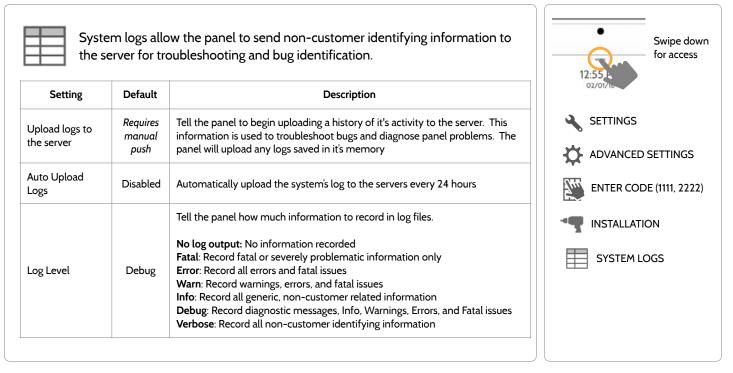

INSTALLER/DEALER SETTINGS

Setting	Default	Description
Jam Detection Local Alarm* Note: Not evaluated by UL/cUL	Disabled	When enabled the system will sound a local alarm. "Jam Detection" must be active for this to function properly
RF Jam Sensitvity Level*	Normal	Choose between HIGH and NORMAL sensitivity levels
Open/Close Reports Allowed For Auto Learn	Enabled	Rather than sending a tamper to auto learn a sensor, enabling this will allow an open/ close of the sensor to trigger auto learn
Panel Glass Break Detector	Disabled	Creates an independent zone that leverages the panel's built-in microphones to act as a glass break detector. This will fall into the zone order at the time you enable this feature
Delete All Sensors	Deletes all securi	ty sensors and Bluetooth devices programmed in the panel
Delete All Z-Wave Devices	Deletes all Z-Way	e devices programmed in the panel. This does not clear the device
Master Reset*	Restores panel to factory settings and erases all content	
Reset Panel With Last Back-up Image*	Restores the panel to factory settings using the last known good software image	

SYSTEM LOGS

SIREN AND ALARMS

Siren and A Change sire		settings for certain types of alarm events.	Swipe down for access
Setting	Default	Description	12:55
Disable Siren	All Sirens On	All Sirens Off: This will disable the siren for all alarm types including any paired or hardwired external sirens All Sirens On: This is the default setting which enables the siren for all alarms Installer/Test Mode: This disables the siren for all alarm types including any paired or hardwired external sirens for 30 mins then all sirens are re-enabled	SETTINGS ADVANCED SETTINGS ENTER CODE (1111, 2222)
Siren Annunciation	Disabled	Panel siren pauses periodically to announce which locations have triggered the alarm. UL Note: for UL/cUL this feature is not allowed for Fire, CO, Burglar Alarm	INSTALLATION
Fire Verification	Disabled	When enabled, panel requires two fire events from smoke detector (one detector twice or two detectors once each)	SIREN AND ALARMS
Severe Weather Siren Warning	Enabled	When enabled, siren will sound when the panel receives a severe weather alert. When disabled, panel will use severe weather chime	

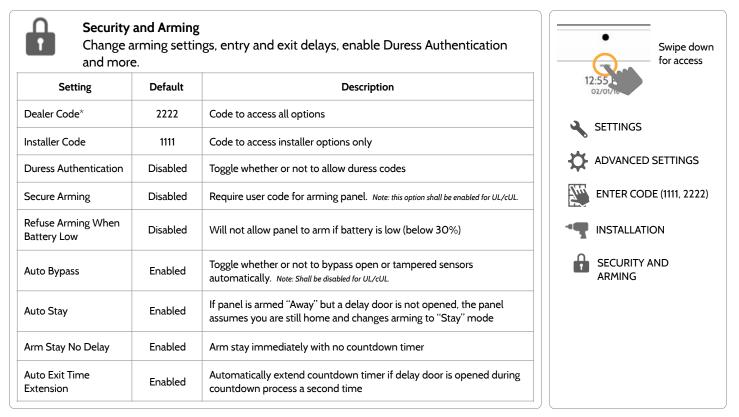

SIREN AND ALARMS

Setting	Default	Description	
Dialer Delay	:30	Amount of time (in seconds) before panel will attempt call to central station after an alarr event is triggered When SIA Limits enabled: :15 to :45 seconds When SIA Limits disabled: :0 to :254 seconds	
Siren Timeout	4 min	Determine how long before siren stops sounding during an alarm event (4 minutes to 8 minutes). For UL/cUL the minimum bell time out shall be set to 5min.	
Nater/Freeze Siren	Disabled	When enabled, siren will sound when a water or freeze detector is triggered. When disabled, the panel emits a "water" tone	
Police Panic	Enabled	Allows Police Panic to be enabled or disabled	
Fire Panic	Enabled	Allows Fire Panic to be enabled or disabled	
Auxiliary Panic	Enabled	Allows Auxiliary Panic to be enabled or disabled	
Allow Master Code To Access Siren and Alarms	Disabled	Allow the master code to access these features and settings. Note: not allowed for UL/cUL.	

SECURITY AND ARMING

SECURITY AND ARMING

Setting	Default	Description
Keyfob Instant Arming	Enabled	When enabled, turns off exit delay if keyfob is used to arm the system
Keyfob Alarm Disarm	Disabled	When enabled this will Allow a keyfob to disarm alarm events, except panics originating from the same key fob
Keyfob Disarming	Enabled	When Disabled, a Keyfob will not be able to disarm the panel
Allow Master Code to Access Security and Arming	Disabled	Allow the master code to access these features and settings. Note: this option shall be disabled for UL/cUL.
Normal Entry Delay	30 Secs	How much time users have to enter their code after opening a door (30-240secs). With SIA limits disabled the minimum time can be set to 5 secs
Normal Exit Delay	60 Secs	How much time users have to exit the location before the panel arms itself (30-254secs). With SIA limits disabled the minimum time can be set to 5 secs. Door/Window group 10 follows the "Normal Exit Delay"
Long Entry Delay	100 Secs	A second separate entry delay that can be used on a sensor needing more time when tripped (45-240secs). With SIA limits disabled the minimum time can be set to 5 secs
Long Exit Delay	120 Secs	A second separate exit delay that can be used on a sensor needing more time when tripped (45-254secs). With SIA limits disabled the minimum time can be set to 5 secs. Door/Window group 12 follows the "Long Exit Delay"

QOLSYS CONFIDENTIAL AND PROPRIETARY PAGE 98 OF 131

The Advanced Sensor Test shows a summary page of

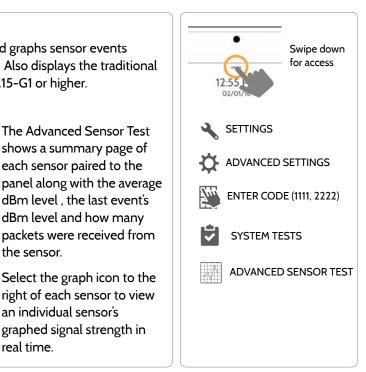

each sensor paired to the

dBm level . the last event's dBm level and how many packets were received from

Select the graph icon to the right of each sensor to view an individual sensor's graphed signal strength in

the sensor.

real time.

ADVANCED SENSOR TEST

- The GREEN dots represent each state change or supervisory signal transmitted from a sensor to the panel.
- The YELLOW line represents a dBm level where signal strength is "Poor" and potential RF failures could occur. This line dynamically adjusts to 12 dBm above the ambient RF noise floor in the environment.
- The RED line represents a dBm level where signal strength is "Critical" and RF failures are likely. This line dynamically adjusts to 6 dBm above the ambient RF noise floor in the environment.

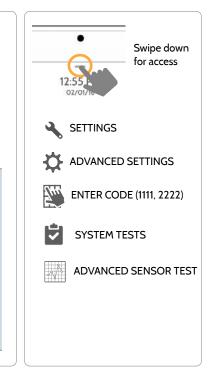

TROUBLESHOOTING:

If a sensor falls below the yellow line, try changing it's orientation (vertical/horizontal), move the sensor to a different part of the door/window or adjust the panel's RF pigtail antenna.

Then re-test to see the if the result improved.

Note: Proper maintenance requires prompt administration of any software updates

UPGRADE SOFTWARE USING WI-FI

FIND IT

Keeping your panel up to date is essential in ensuring it receives the newest features and is free from bugs.

To perform a software update using Wi-Fi follow the steps below:

1- Ensure your panel is connected to Wi-Fi and has an internet connection.

2- From the drop down menu select "Settings" then "Advanced Settings". (Installer/Dealer Code)

3- Touch "Upgrade Software"

4- Touch "Upgrade Using Network" The IQ Panel 2 will check for the latest software update. If your panel is up to date you will see a message confirming that you have the most recent software version.

5- If a software update IS available the panel will automatically begin downloading it.

6- Once the download is complete a pop up message will appear informing you that in order to install the software you must restart the panel. Touch "okay." Your panel will install the update and automatically restart.

SOFTWARE UPDATES VIA SD CARD

- 1- Insert an SD card into your computer. ("We recommend a class 4 or higher SDHC card with 4gb 16gb storage space)
- 2- Download the current software from <u>dealers.golsys.com</u> (requires login)
- 3- Once the file is downloaded, right click the file and select "Unzip" or "Open"
- 4- Drag all files to your SD card. Delete ANY other files, and safely remove the SD card

from your computer

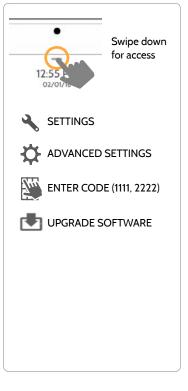

- 5- Slide your SD card into the slot on the upper right side of the IQ Panel 2.
- 6- From the drop down menu Touch "Settings"
- 7- "Advanced Settings" and enter a valid Installer code (default is 1111)
- 8- Touch "Upgrade Software"
- 9- Touch "Upgrade using SD Card"

10- The panel will search the SD Card for the patch and begin downloading it automatically.

11- Once complete touch "OK" to reboot the panel. DO NOT TOUCH THE SCREEN. The process will take about 5 minutes and the LED may turn red, screen may turn off, etc. After the panel reboots the home screen will appear and the LED will turn green. For the next 5 minutes the panel will update the backup partition. Do not power down or use the panel during this time

11- Eject the SD Card: ("Settings" then touch "SD Card" then "Unmount SD Card" IMPORTANT: Failure to perform these steps in the proper sequence may result in data corruption and/or panel failure.

FIND IT

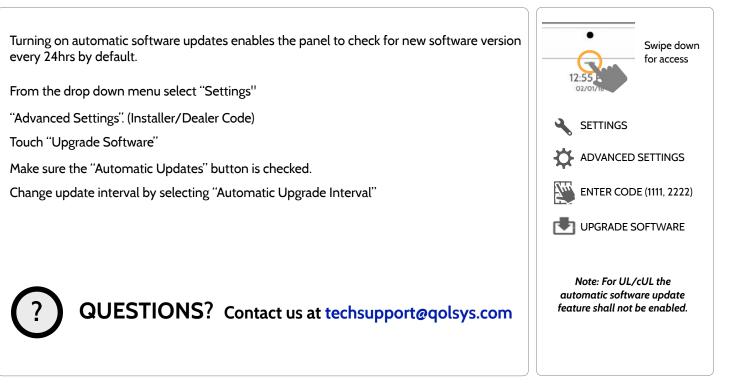

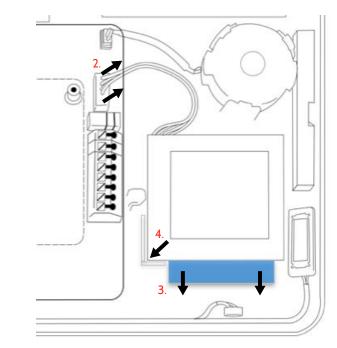

AUTOMATIC SOFTWARE UPDATES

BATTERY REPLACEMENT

- 1. **Power down panel:** Go to Advanced Settings and enter the Installer/Dealer/Master code, then select "Power Down"
- 2. **Unplug Battery Connector**: Once the panel is powered down, unplug 4 pin battery connector from the board.
- 3. **Remove Battery:** Pull the blue tab from under the battery downwards. This will peel away the tape holding the battery in place.
- 4. **Install New Battery:** Remove the protective film from the adhesive tape on the back of the battery and seat the battery into the bottom lefthand plastic corner. Plug the battery connector back into the board.

CAUTION:

Do **NOT** use a screwdriver or anything sharp that could puncture the battery.

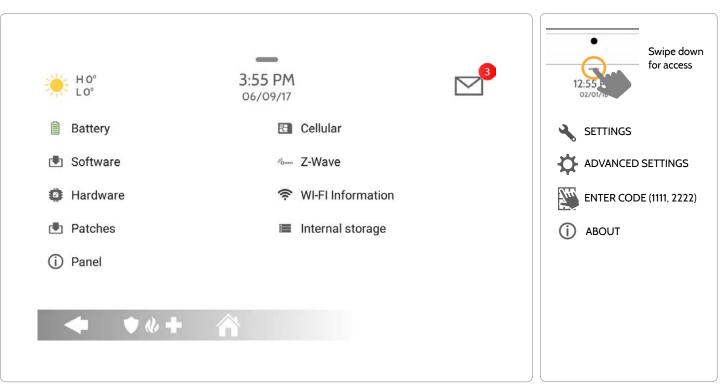

Do **NOT** pull on the battery cable to try and remove battery.

PANEL TEST TROUBLESHOOTING

If you run a panel test and it fails, use the following steps to fix the issue.

Test	Description	If fails:
Arm-Disarm	Tests the arm/disarm operation	Reboot panel, run test again then if necessary perform a master reset and repeat test
Camera	Tests panel camera operation	Reboot panel, run test again then if necessary perform a master reset and repeat test
Photos	Checks that photos are loaded in the photo frame app	1) Go to Settings -> Photo Frame -> Add Photos 2) Add photos from Wifi photo sets or an SD card
Help Videos	Checks help videos are installed in the panel.	 Go to Settings/Advanced Settings/Installation -> Load Help Videos Load All the Help videos in SD card and insert it into panel Add the selected files from SD card to help videos list on the panel
Battery	Checks panel battery health	 Make sure the battery is connected If test continues to fail, replace the battery
LED Green/Red	Check panel LED operation	1) Reboot the panel and run the test again 2) Master reset and repeat test

PANEL TEST TROUBLESHOOTING

Test	Description	If fails:
Panel Tamper	Check panel Tamper state	 1) Check to ensure backplate is secure and installed properly. 2) Repeat test.
AC Status	Check panel AC power status	 Inspect the wire leads are secure and properly connected on the terminal block and adapter. Repeat test.
Internet Connection	Check panel's Internet connectivity	 Go to Wifi Setting page, Enable Wifi and connect to a Wifi Network Make sure Internet is available on the home router. You can check internet information in the "About" section. Contact your network service provider on continued internet connectivity failure.
Wi-Fi	Tests whether panel is connected to Wifi network	 Go to Wifi Setting page and enable wifi. Connect to a Wifi Network
Upgrade Service	Checks that the panel can receive updates from the Qolsys servers	1) Verify internet and Wi-Fi connections.
Z-Wave	Check panel's Z-Wave module operation	1) Reboot the panel and repeat test. 2) Master reset and repeat test
Sirens	Check that the panel's siren is functioning properly (Burglar, Auxiliary, Fire & CO).	1) Verify the siren is plugged in

CANNOT LOAD HELP VIDEOS

If your panel cannot load a help video you will receive an error message. Please ensure that your video(s) meet the requirements:

Acceptable File types: .m4v

Total storage space: 200MB

NOTE: videos look best in aspect ratio 1280x800

IMPORTANT

Important warning and information can be found on the interior and exterior of the panel's mounting plate. 11111 Colsys 10 E ₿

IMPORTANT

This Class [B] digital apparatus meets all requirements of the Canadian Interference–Causing Equipment Regulations.

Cet appareil numérique de la classe [B] respecte toutes les exigences du Réglement sur le matériel brouilleur du Canada.

IMPORTANT! Changes or modifications not expressly approved by Qolsys Inc. could void the user's authority to operate the equipment.

CAUTION! This equipment complies with radiation exposure limits set forth for uncontrolled environment. The antenna(s) used for this transmitters must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

SPECIFICATIONS

Items	Parameters	IQ Panel 2
Platform	Android OS	Android 5.1
LCD Display	Size	7" LCD
	Resolution	1280 x 800
	Brightness	300 cd/m2
	RGB	24bit
Touchscreen	Туре	Capacitive glass multi-touch
User Codes	Up to 242	Role based (Dealer, Installer, Master, User, Guest, Duress)
Wireless	WiFi	Wi-Fi 802.11 a/b/g/n/ac dual band 2.4/5ghz - including built-in router capability
	Image Sensor	Supports up to 5 Alarm.com Image Sensors (if included)
	Z-Wave	Supports up to 134 devices (80 lights, 15 Smart Sockets, 6 Locks, 6 Thermostats, 21 Misc, 6 Garage Doors)
	Cellular	LTE (Bands 2,4,5,12,13,17)
	Security R/F	Encrypted 319.5MHz, up to 128 RF zones, with legacy device support
	Bluetooth	Qualcomm Bluetooth Low Energy (BLE) 4.0
Hardwire Input	Wired x2	2 non powered closed loop circuit with 4.7k EOL resistor
Siren Output	Wired x1	1 controlled output (open collector), 300mA max with a 12v power supply wired in series
Flash Memory	Internal Storage	12GB NAND Flash
SD Card Slot	Push-Push	Micro SD slot x 1
LED Indicator	Status LED	Green (Disarmed), Red (Armed)
Speaker	Stereo 1W x 2	Stereo speakers (unified audio)

SPECIFICATIONS

Items	Parameters	IQ Panel 2
Camera	Front Camera	5MP fixed focus
Microphone	Microphone	Stereo microphones x 2
Siren	Piezo	SPL minimum 85dB for UL985
Tamper	Tamper Switch	Reporting tamper release button
Battery	Туре	Litium Polymer 3200mAh
Buttons	Standby	Right side button used for sleep/wake, hard reboot, and clean screen cancel
Mechanical	Dimension	5"H x 7.75"W x .75"D (195mm x 130mm x 23mm)
Power Supply	AC/DC	Output: 5v - 5.5v 1000mA DC, Input 100-240VAC 50/60Hz
Mount	Back Plate	Wall mount or table top (stand included)
Certification	UL/cUL	UL-985, UL-1023, UL-1635, UL-639, UL-498A, UL-634, ULC-634, ULC-S306, CSA-C22.2
	FCC	2AAJXQS-IQPANEL2 (may contain additional modules with separate FCC ID's)
	IC	11205A-QSIQPANEL2
	Safety	
Temperature	Operational	-10-50C, Note: not evaluated by UL/cUL
	Storage	-40 - 80C
